- Smooth
- Safety

PRE-TENSION SLING

信長の腕

utility model No.3029726

AUZAC CO.,LTD.

NOBUNAGA "Super" Sling!!

Features

Safety・Reliability

- Each of the hooks can be set safely and reliably because the hooks do not come off owing to their own weight and imbalance.
- You can easily perform hoisting work by yourself.
- When lifted items are connected to ground, the hooks do not easily come off because of the slack of chains.
- As the winding parts of chains are differently colored, you do not need to worry about getting your hands caught.

Rationality・Reasonability

- You can lift items smoothly because tensile strength is not suddenly applied owing to spring action when hoisting a grounded load.
- As you can work quickly and surely, the operation time will be shortened.
- As the the entrance width of the hook is wide, it can correspond to various objects.
- You will be liberated from troublesomeness because it is possible to work by one hand.

High Strength・Abrasion Resistance

- There are few breakdowns and the maintenance is easy because the structure is simple.
- The light weight and the highest strength of this product have been achieved by using special alloy as materials.
- It is excellent in abrasion resistance because heat treatment is applied under stringent control.

Just pull it and set it.
Suspended loads are hold by the simple method safely and reliably.

In the case of conventional products when one was set, the other was not set.

You can easily and firmly set this pre-tension sling with one hand.

In the case of conventional products, they were not able to be set on the both sides by one worker.

You can easily handle it by yourself because the hook of pre-tension sling lengthens.

■Specification of product
 Specification load●10kg~2.5ton Breaking force●12.5ton
 Stroke●180mm Product load●About 7.5kg

■Option
 ●Hook..fastening plate..coming off ●Length change in chain
 Please read the manual before using this product.
